Profile

Computer Science Sophomore specialising in AI/ML at MITAOE, with hands-on experience in applied AI, computer vision, and full-stack development through internships and technical projects. Interested in building scalable, reliable solutions using machine learning, modern web technologies, and data-driven approaches, with a focus on solving real-world problems.

Education

MIT Academy of Engineering (MITAOE) **Expected 2029**
B.Tech. CSE (AI & Machine Learning) | CGPA: 8.5/10 *Pune, India*

Podar International School, Chinchwad **2024–2025**
Class XII | Board Percentage: 87% *Pune, India*

Podar International School, Chinchwad **2022–2023**
Class X | Board Percentage: 96.4% *Pune, India*

Technical Skills

Programming Languages: Python, C++, JavaScript (ES6+), TypeScript, SQL
AI/ML & Data Science: PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, OpenCV, SHAP, Feature Engineering, OCR
Full-Stack Development: MongoDB, Express.js, React.js, Node.js, Next.js, REST APIs, HTML5, CSS3, Tailwind CSS
Backend & Databases: FastAPI, PostgreSQL, MySQL, MongoDB, API Integration, Authentication, Database Design
MLOps & Developer Tools: MLflow, Evidently AI, pytest, Git, GitHub, Linux, Performance Benchmarking, Piston
Additional Technologies: Godot Engine, GDScript, Manim, Computer Vision, Code Optimisation, Open-Source Development

Experience

OBLIQ-in **Sep 2026 – Present**
Founding Engineer Intern *Remote*

- Drive early-stage product development, coordinate engineering workflows, and contribute to open-source initiatives from planning to delivery for CA Audit firms and automating resources for them.

Vicharanshala Labs, IIT Ropar **May 2026 - Jul 2026**
AI/ML Intern *Remote*

- Applied AI/ML techniques to develop and evaluate models, document findings, and present technical outcomes through IIT Ropar's Vicharanshala programme.

Vertex GDNA, MITAOE **Sep 2025 – Present**
Junior Animator & Club Coordinator *Pune, India*

- Coordinate game development and graphics initiatives, organise Manim-to-Godot learning sessions, and promote collaborative technical learning within the club.

Projects

Sanchay | *Python, ML, SHAP, FastAPI* GitHub

- AI-driven fraud and anomaly detection system with explainable risk scoring and an escalation workflow for flagged cases.
- Engineered an AI-driven risk analysis pipeline to flag suspicious expenditure patterns, implementation anomalies, and potential irregularities in MPLADS-funded projects.
- Explored retrieval-augmented generation (RAG) to support evidence-grounded analysis of audit documents and scheme guidelines.

TRACERA | *Next.js, TypeScript, Audit Workflows* GitHub

- Built document-review workflows supporting submission, approval, correction requests, and document version tracking.
- Implemented traceable audit events to improve accountability and preserve review history across document lifecycle stages.
- Designed a structured review interface for organising client documents and tracking outstanding corrections.

Paperloop | *Next.js, TypeScript, AI, REST APIs* GitHub

- Developed a workflow connecting institutions, recyclers, and NGOs to coordinate paper collection and recycling.
- Designed batch and shipment tracking with milestone updates and supporting evidence across the recycling lifecycle.
- Integrated persistent data models and location-aware recycler discovery to support coordination between participating groups.

ReRoute | *Next.js, TypeScript, OCR, Computer Vision* GitHub

- Designed an AI-assisted document-verification pipeline to extract information, detect discrepancies, and identify missing evidence across financial application workflows.
- Developed journey-state tracking and dynamic recovery flows to guide users toward resolving specific application blockers.

Achievements & Extracurriculars

- **1st Runner Up, PVG Ignition Hackverse** – Developed an automated insurance risk assessment and underwriting platform to streamline risk evaluation and support data-driven decisions for insurance underwriters.
- **1st Place, Fund Arcade** (Pune Start-Up Fest 26, COEP) – startup analysis and investment decision competition.
- **Smart India Hackathon 2026 Internal Round Qualifier** (Team Agastya_01) : **PS-26102** – AI fraud and anomaly detection for MPLADS Scheme; **PS-26239** – AI-Enabled Scholarship and Fellowship Management System for Scheduled Tribes.
- **Other:** Contributor, Open Source Connect (OSCI '26); Management Team, E-Cell MITAOE.
